

PortableRL

Mobile optical 3D measurement device
of large components

PortableRL

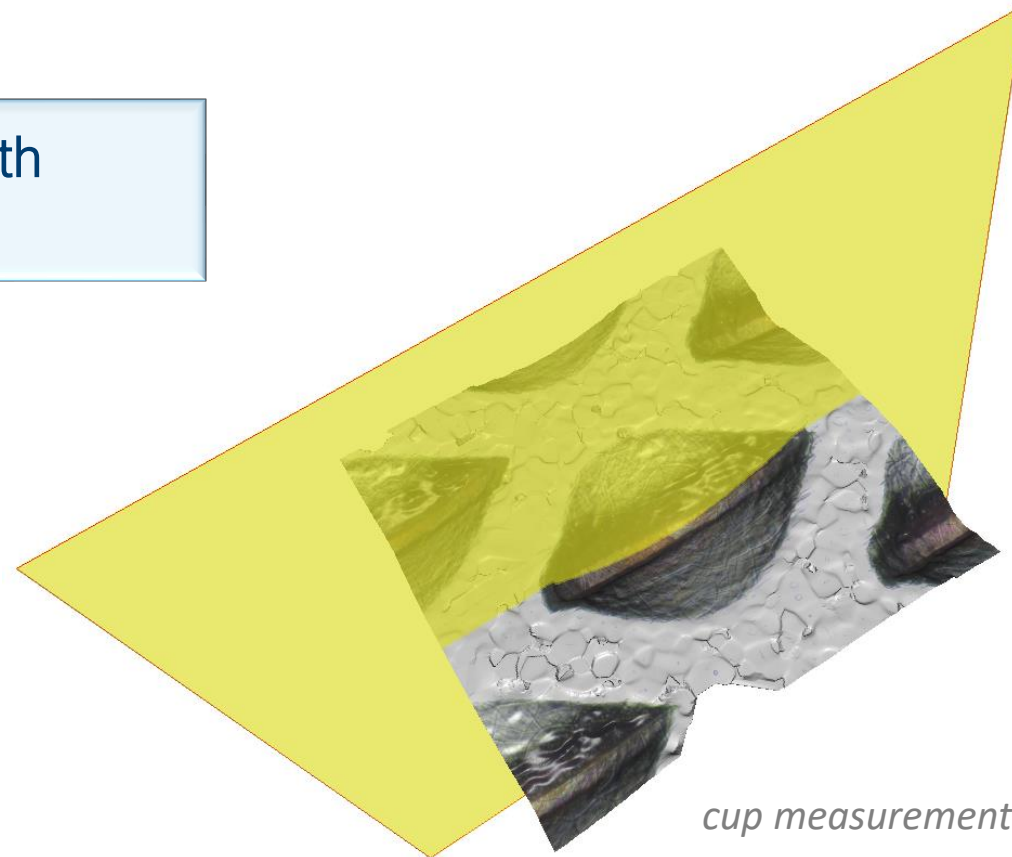

Measure form & roughness on larger components

platen surface measured with IF-Portable

PortableRL

Measure complex shapes with
flanks of up to 86°

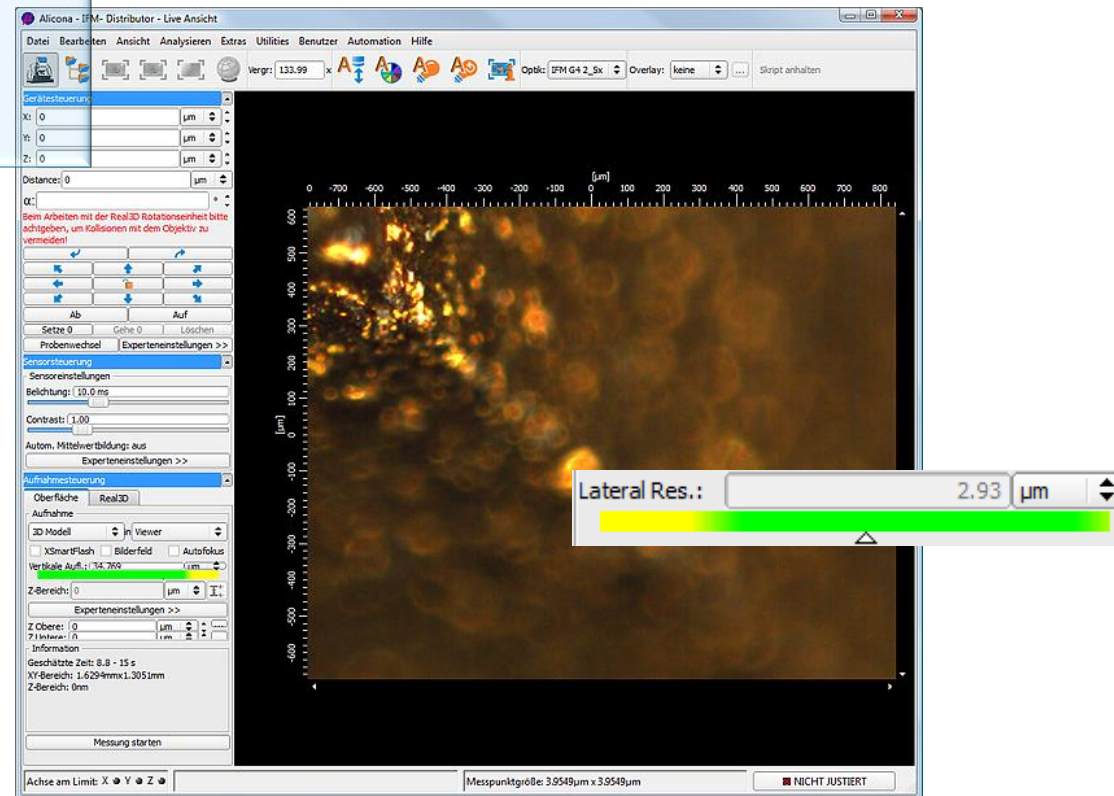

PortableRL

High stability against ambient light, temperature fluctuations and vibrations

PortableRL

Quick and easy change of resolution settings

PortableRL

Fast objective change due to nosepiece

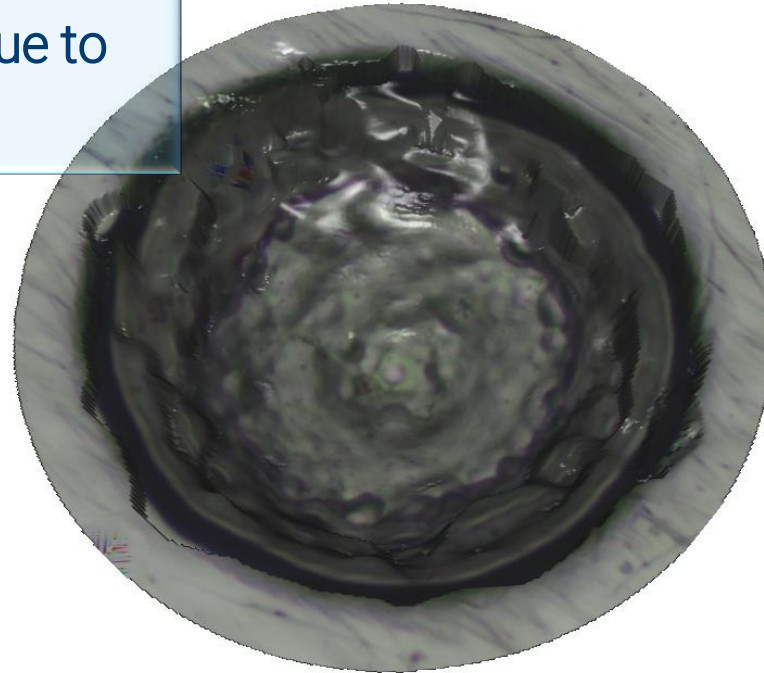

Bruker alicona

PortableRL

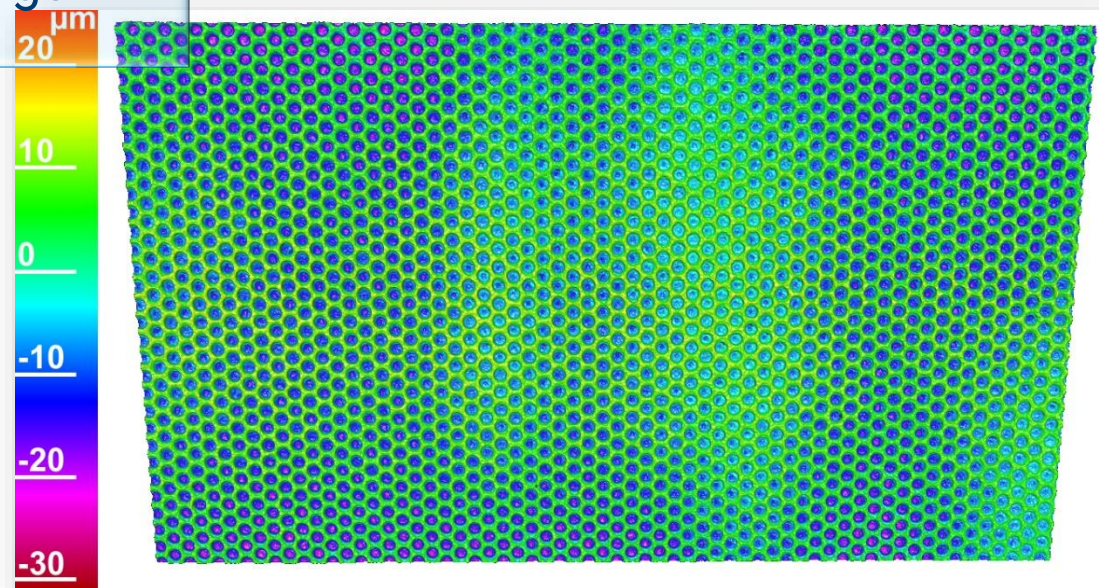

Better evaluation of the surface due to color information

3D dataset with registered true color information

PortableRL

Measure large components due to the large xy-measurement range

platen surface measured with IF-Portable

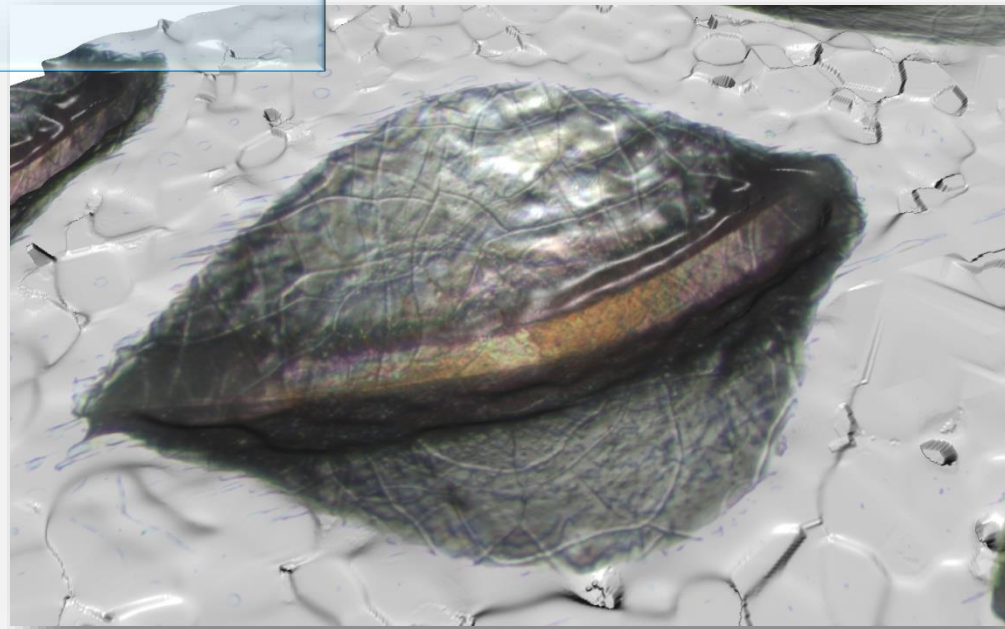

PortableRL

Easy usage due to simple positioning on the components

PortableRL

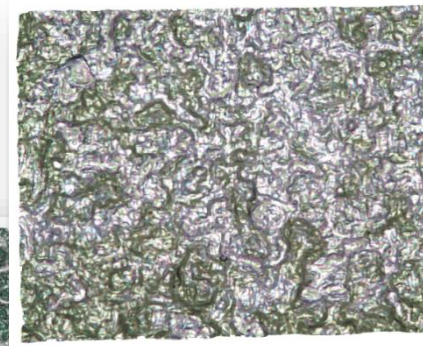

Evaluate the surface by its optical impression using color information

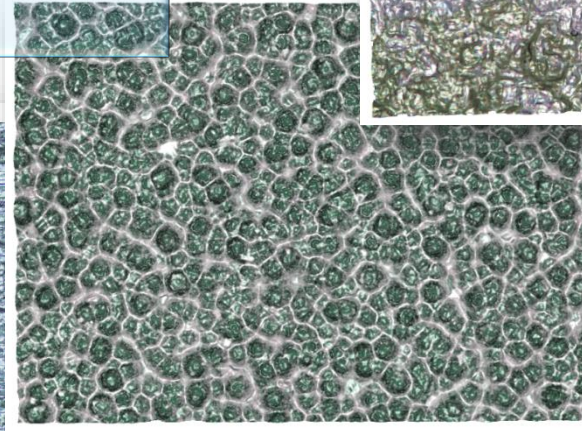

3D cup measurement

PortableRL

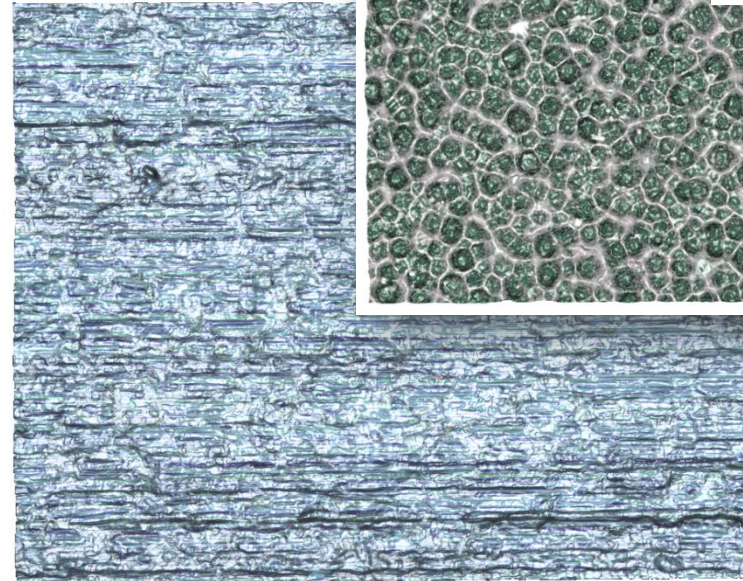

Exact measurement of various material and reflection properties

ceramic surface

coated roll

ski surface

PortableRL Accessories

Mobility Case

Battery pack
